

GOLDFERRE

QUADRA

Entry model ideal for education

Designed for quick and easy set-up astonishes with its simplicity and quality. Six different models (250W and 400W) will satisfy various education and business applications.

The specially designed rotating head (360°) enables all-side projections.

Quadra is equipped with unique **Vega** optical elements, designed and manufactured by **Vega**, which is one of the key strengths of **Vega's** products. Through many years of experience we have achieved perfect quality of optics, this being confirmed by references from our partners and customers throughout the world.
